Dimensio

Cutting length of the extension shaft

The base mounting execution is provided with integrated control knob and includes the housing for the shaft and the fixing screw.

The depth of insertion of the shaft in the housing has a tolerance of about 20mm, this allows to reduce the need and the precision of the cutting to size (dimension L) of the shaft.

To determine the cut length L of the shaft, consider the following guidelines:

$L_3 \geq 1\text{mm}$
 $12\text{mm} \leq L_2 \leq 32\text{mm}$

In practice: $L_1 - 53\text{mm} \leq L \leq L_1 - 33\text{mm}$
