

ENVIRONMENTAL POLICY

Bremas Ersce is specialized in design and manufacturing of industrial switches, cam switches, control and signalling units, position switches, moduls and sockets for relays.

It is the policy of Bremas Ersce management to fully support and provide the necessary resources for continual implementation of the environmental management system according to standard ISO 14001:2015.

The objectives that Bremas Ersce has set itself relating to the environment are:

- to monitor and, where possible, to reduce energy and water consumption;
- to implement pollution reduction policies, involving all company personnel;
- in the field of technological innovation, to direct purchases towards technologies that provide for the reduction of the quantities of dangerous substances and encourage their replacement;
- ensure that the products made do not contain chemical substances in concentrations higher than those required by law (e.g. REACH directive, RoHS) and by customer specifications;
- to ensure that every person who works in the company and who manages the environmental aspects understands their environmental responsibilities and takes them into account when carrying out their daily work;
- to maintain a clear and transparent level of communication with the outside regarding the environmental impacts produced by company activities;
- to guarantee the disclosure and the release of the contents of its Policy to company personnel, to suppliers and to all people acting on behalf of the company, to the public and to interested parties;
- to start actions to involve its suppliers in the correct management of the environmental aspects connected with their carried out activities.
